HAM CLIPPER

1. Purpose

Tag applicators are intended for applying tags on the chub rolls in perforated casing.

2. Design and parts list

1. Body of the stuffer
2. Clipping mechanism
3. Turning mechanism
4. The arm of the turning mechanism
5. Clipping lever
6. Perforated casing
7. Clip

3. The process of applying tags on the chub rolls in perforated casing.

- 3.1. Place the round clip (7) on a chub roll in a perforated casing (6).
 - 3.2. Place the chub roll on the body of the stuffer (1).
 - 3.3. Put the end of the chub roll with the clip into the clipping mechanism (2), and lock it.
 - 3.4. Insert the ending of the casing that comes out of the clip between the forks of the turning mechanism (3).
 - 3.5. By turning the arm (4), the casing is being twisted and the air is released from the chub roll.
 - 3.6. After releasing the air, use the lever (5) to tighten the clip on the casing.
 - 3.7. Open the clipping mechanism (2) and remove the chub roll.
- The device is now ready for the next process.
